Subject: RE: PCB issue in PA

Jenifer-

Here is the recent salient issue that summarizes the issue:

Region III issues Notices of Non-compliance/Information Request Letters (NON/IRL) to Pennsylvania facilities holding PADEP Beneficial Use permits to use PCB-contaminated materials for use as construction material and fill.

The LCD Toxics Programs Enforcement Branch issued four NON/IRLs and one IRL to five facilities in Pennsylvania that currently hold PADEP Beneficial Use and Clean Fill permits. The facilities receiving the NON/IRLs are Hazleton Creek Properties Inc., Coplay Aggregates, Inc., Bethlehem Earth, Inc., and Phase III Environmental, Inc. All four facilities have received materials containing PCBs equal to or greater than 2 ppm, that has been used as construction material or fill. The IRL was sent to the Allegheny County Redevelopment Authority. The responses will help determine the volumes of PCB-containing materials used at each facility, the concentration range of the PCBs in those materials, and institutional controls that may or will be implemented.

EPA has been coordinating with PADEP to explore options to revise the Beneficial Use Permit and the Clean Fill Policy to only allow use of materials containing less than 2 ppm of PCBs. (Scott Rice, 304-231-0501; Cheryl Jamieson, 4-2375)

Please let us know if you need more or different information.

Thanks,
Dave

Subject: PCB issue in PA

Can either of you send me an electronic version of the briefing/TPs you prepared for Cos? He is going to follow up with an email and would like to include a written summary of the issue (I'll edit it down to a paragraph).

Thanks
Jen
